

REMARKS

This paper presents an amendment to the specification to refer to and incorporate by reference the parent application to the present application. As this reference and incorporation by reference was originally made in the Transmittal form filed with the present application, neither the reference to nor the incorporation of the parent application presents new matter.

In addition, this paper also presents an amendment to the specification of the present application to correct a typographical error. In particular, during duplication of the present application, the text of pages 46 and 47 were inadvertently switched, such that the text that should have appeared on page 47 was found instead on page 46, and *vice versa*.

To correct this error, Applicant respectfully requests that the specification be amended as set forth in the amendment above, which replaces the text on pages 46 and 47 with the proper text. No new matter is added by the amendment as all of the text was present in the application as filed, albeit in reverse order. Therefore, the amendment to the specification is fully supported by the application as filed.

As no new matter is added by the amendments to the specification, entry of the instant amendments to the specification under is hereby respectfully requested 37 C.F.R. § 1.115.

CONCLUSION

In light of the above amendments and remarks, the Applicant respectfully requests that the Examiner consider this application with a view towards allowance. The Examiner is invited to call the undersigned attorney at (650) 739-3949, if a telephone call could help resolve any items remaining prior to issuance.

Date: November 8, 2004

Respectfully submitted,

David C. Pauling
